

## Program Records

<b>About the Program</b>	The Department of Economics was established in 2019 within the Faculty of Managerial Sciences. The department provides 5-year undergraduate education including 1 year in the English Preparation Program in the AGÜ School of Foreign Languages. The department consists faculty members who have been trained in prestigious universities and are motivated to train the future leaders. Undergraduate curriculum is designed to encourage innovative problem-solving techniques with real life examples, and it offers a rich platform for exploring basic economic theory. The curriculum is designed to allow and enable students to pursue a diversity of career paths including academic careers, employment in public and private firms, and entrepreneurial careers. Students are assigned academic advisors to guide course selections, are exposed to both theoretical and applied courses within the field of economics, should take elective courses offered by the economics department and by other departments, are expected to perform one internship before graduation, and they are allowed to enroll in minor or double-major programs offered by various departments at AGÜ. The program started accepting students in the academic year 2019-2020.
<b>Program Objectives</b>	To provide a modern and comprehensive research and education opportunity towards understanding markets, economic activities, and their functions. To train young and active economists, who are going to move society forward, who have ethical values, are self-confident, and can conduct advanced analyses.
<b>Qualification Awarded</b>	Bachelor's Degree / Economist
<b>Length of Program &amp; Credits</b>	4 years (excluding one year of English Preparatory Program) 240 ECTS
<b>Level of Qualification</b>	First Cycle (Bachelor's) Degree; EQF-LLL Level 6, QF-EHEA Level 1
<b>Mode of Study</b>	Full Time
<b>Field of Study</b>	Social and Behavioral Sciences
<b>Admission Requirements</b>	High school diploma; Placed by National Higher Education Exam (YKS) scores; Proof of English proficiency (TOEFL or Abdullah Gül University English Proficiency Exam) For foreign students, proof the admission requirements that are announced by the university.
<b>Recognition of Credit Mobility</b>	Courses taken outside of the program could be transferred in accordance with the associated principals of the Abdullah Gul University Undergraduate Education and Examination Regulation rules by the respective management board.
<b>Graduation Requirements &amp; Regulations</b>	Student has to complete all courses in the program curriculum with a minimum GPA of 2.00.

<b>Occupational Profiles of Graduates</b>	<p>Graduates can find employment in both public and private enterprises. Job opportunities can be found in:</p> <ul style="list-style-type: none"> <li>- Institutions such as: Central Bank, Turkey Statistical Institute, Capital Markets Board of Turkey, Banking Regulation and Supervision Agency, İstanbul Stock Exchange Market, Development Agencies and Ministries,</li> <li>- Organizations such as: International Monetary Fund, World Bank, Islamic Development Bank, United Nations,</li> <li>- Various departments of business enterprises working domestic or internationally such as finance, trade, human resources, and operations departments,</li> <li>- Private and public banks,</li> <li>- Non-governmental organizations,</li> <li>- Universities, and research firms and organizations.</li> </ul>
---	--

<b>Access to Further Studies</b>	Graduates may apply to second cycle (Level 7 or Level 8) degree programs.
----------------------------------	---

<b>Assessment &amp; Grading Policy</b>	Based on Abdullah Gul University Undergraduate Education and Examination Regulation rules;
--	--

<u>Letter Grade</u>	<u>Coefficient</u>	<u>Score</u>	<u>Status</u>	<u>Letter Grade</u>	<u>Status</u>
A	4,00	90-100	Pass	NA	Not Attended
A-	3,67	87-89	Pass	W	Withdrawn
B+	3,33	83-86	Pass	I	Incomplete
B	3,00	80-82	Pass	T	Transferred
B-	2,67	77-79	Pass	S	Satisfactory
C+	2,33	73-76	Pass	U	Unsatisfactory
C	2,00	70-72	Pass	P	In Progress
C-	1,67	64-69	Conditional Pass	EX	Exempt
D+	1,33	56-63	Conditional Pass		
D	1,00	50-55	Conditional Pass		
F	0,00	0-49	Failed		

<b>Program Outcomes</b>	<p>PO1. Possess working knowledge on the instruments to understand Turkey's economy, its international economic relations, and global economies in their dynamics.</p> <p>PO2. Have ability to recognize and interpret different market conditions and their interactions and propose original policy suggestions about their workings.</p> <p>PO3. Understand financial markets accurately, follow their recent developments and have the knowledge and skills to respond fast and in accordance with the necessities of the markets.</p> <p>PO4. Form predictions about expected and unexpected short and long-term economic changes.</p> <p>PO5. Have interest in global problems such as poverty, inequality, and climate change, and being able to work and propose solutions in these fields.</p> <p>PO6. Possess skills of data reading, processing, analyzing, and interpreting.</p> <p>PO7. Possess interdisciplinary research skills.</p> <p>PO8. Have ability to take an active role in interdisciplinary industrial relations.</p> <p>PO9. Understand topics of education, sustainable cities, responsible consumption, and production, and developing relevant policies.</p> <p>PO10. Possess necessary skills to understand and make interpretations of new concepts such as big data and smart cities.</p>

## Program Bilgileri

<b>Program Hakkında</b>	AGÜ Ekonomi Bölümü 2019 yılında Yönetim Bilimleri Fakültesi'ne bağlı olarak kurulmuştur. Bölümde 1 yılı hazırlık olmak üzere 5 yıllık lisans eğitim programı yürütülmektedir. Bölüm bünyesinde geleceğin yetkin liderlerini yetiştirmeye odaklanmış ve seçkin uluslararası kuruluşlarda eğitim almış öğretim üye ve elemanları görev yapmaktadır. Müfredatta bulunan dersler gerçek yaşamdan örnekler kullanılarak, yenilikçi problem çözme tekniklerini teşvik etmektedir ve temel iktisat teorisini keşfetmeye yönelik zengin bir platform sunmaktadır. Program müfredatı öğrencilerin akademik kariyer, kamu ve özel sektör iş ve çalışma alanları ve girişimcilik gibi çeşitli kariyer yollarını seçmelerine olanak tanıyacak ve buna yardımcı olacak biçimde tasarlanmıştır. Lisans eğitimi süresince her öğrenciye ders seçimlerinde yardımcı olmak üzere öğretim elemanları arasından seçilen bir danışman atanır, her öğrenci ekonomi alanında teorik ve uygulamalı dersler alır hem ekonomi bölümü hem de diğer bölümler tarafından açılan seçmeli derslerden seçer, mezun olmadan önce bir kere staj yükümlülüğünü yerine getirir ve tercihe bağlı olarak diğer bölümler tarafından açılan yan dal ve çift anadal programlarına kaydolabilir. 2019-2020 eğitim öğretim döneminde öğrenci kabul edilmeye başlanmıştır.
<b>Program Hedefleri</b>	Ekonomik faaliyetleri ve piyasaları anlama ve işleyişlerini kavramaya yönelik modern ve kapsamlı araştırma ve eğitim imkanı sunmak. Toplumu ileri ekonomik seviyelere taşıyacak, etik değerlere sahip, kendine güvenen, ileri düzey analiz yapabilen genç ve aktif ekonomistler yetiştirmek.
<b>Kazanılan Derece</b>	Lisans / Ekonomist
<b>Öğrenim Süresi ve Kredisi</b>	4 yıl (bir yıl İngilizce Hazırlık Programı hariç) 240 AKTS
<b>Öğrenim Düzeyi</b>	Lisans; EQF-LLL 6. Düzey, QF-EHEA 1.Düzey
<b>Eğitim Türü</b>	Tam Zamanlı
<b>Eğitim Temel Alanı</b>	Sosyal ve Davranış Bilimleri
<b>Kabul Koşulları</b>	Lise diploması; Ulusal Yükseköğretim Kurumları Sınavı (YKS) yoluyla yerleştirilmiş olmak; Abdullah Gül Üniversitesi İngilizce Hazırlık Programı Muafiyet Sınavında başarılı olmak ya da TOEFL'dan yeterli yabancı dil puanını almış olmak. Yabancı öğrenciler için, üniversite tarafından ilan edilen şartları sağlamak.
<b>Önceki Öğrenmenin Tanınması</b>	Program dışında alınan derslerin transferleri, Abdullah Gül Üniversitesi Lisans Eğitim Öğretim ve Sınav Yönetmenliğinde yer alan esaslara göre ilgili yönetim kurulu kararı ile yapılır.
<b>Mezuniyet Koşulları ve Kuralları</b>	Öğrencinin, müfredatta yer alan tüm dersleri, Genel Not Ortalaması (GPA) en az 2.00 olacak şekilde tamamlaması gerekmektedir.

<b>Mezunların Mesleki Profili ve İstihdam Olanakları</b>	<p>Ekonomi Bölümü mezunları kamu ve özel sektörde çalışma imkanına sahip olmaktadır. İstihdam olanakları:</p> <ul style="list-style-type: none"> <li>- Merkez Bankası, Devlet İstatistik Enstitüsü, Sermaye Piyasası Kurulu, Bankacılık Düzenleme ve Denetleme Kurumu, Borsa İstanbul, Kalkınma Ajansları ve Bakanlıklar gibi birçok kurum,</li> <li>- Uluslararası Para Fonu (IMF), Dünya Bankası, İslam Kalkınma Bankası, Birleşmiş Milletler gibi uluslararası kuruluşlar,</li> <li>- Yurtiçi ve yurtdışında bulunan ulusal ve uluslararası firmaların finans, dış ticaret, insan kaynakları ve operasyon gibi çeşitli departmanları,</li> <li>- Özel ve kamu bankaları,</li> <li>- Sivil toplum kuruluşları,</li> <li>- Üniversiteler ve araştırma kuruluşları.</li> </ul>																																																																								
<b>Üst Derece Programlarına Geçiş</b>	Program mezunları, lisansüstü programlarda (7. Düzey veya 8. Düzey) öğrenim görmek üzere başvuruda bulunabilirler.

Hour per week	3 (3+0)
Credit	3
ECTS	5
Level/Year	Undergraduate/1
Type	Compulsory
Prerequisites	-
Description	The course is designed as an introductory course on basics of microeconomics at undergraduate level. The content includes theoretical information on how economic activities and relations function, the way individuals, households and firms behave and make decisions, factors affecting these decision-making behaviors, and principles of allocation of resources. In addition to these subjects, different types of market structures and workings of these markets are explained and information on current methodologies and approaches is given at beginner level.
Objectives	Defining main concepts of microeconomics. Examining the topic of consumer behavior. Examining the topic of firm behavior. Introducing different types of markets (competitive market, monopoly and oligopoly).
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Define main topics, basic concepts and terminology of microeconomics. LO2. Discuss the theoretical background of how people make decisions related to consumption and production. LO3. Explain different cost concepts, demand and supply relations, competition and various market structures. LO4. Discuss a few example applications of microeconomic theory on related societal issues.

İçerik	Ders lisans düzeyinde mikroekonominin temellerine giriş dersi olarak tasarlanır. İçerikte, ekonomik faaliyet ve ilişkilerin nasıl işlediği, birey, hanehalkı ve firmaların nasıl davranıp karar aldıkları, bu karar ve davranışları etkileyen faktörler ile ilgili teorik bilgiler ve kaynakların bölüşümü prensipleri incelenir. Bunlara ek olarak farklı pazar yapıları ve bu pazarların işleyişleri incelenir ve güncel yöntem ve yaklaşımlarla ilgili başlangıç düzeyinde bilgi verilir.

**COURSE RECORD**

Code	<b>ECON 102</b>
Name	<b>Exploring Economics II</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/1
Type	Compulsory
Prerequisites	-
Description	The course is designed as a continuation of ECON 101 - Exploring Economics I. Basic macroeconomic issues such as determination of output, employment, unemployment, interest rates, inflation and economic growth are introduced. By the end of the course students are expected to develop an understanding of major economic institutions, functioning of markets and the challenges faced in using policy to influence unemployment and inflation levels. Students are introduced to economic models that describe significant

	parts of current economic system and their applications in settings of current and new events and problems.
Objectives	Defining fundamental concepts of macroeconomics. Describing macroeconomic variables such as inflation, economic growth, unemployment and CPI. Evaluating economic models to analyze macroeconomic events and news.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Define the main concepts and terminology in macroeconomics. LO2. Interpret the theoretical underpinnings of how countries grow, how inflation affects well-being and why there is unemployment. LO3. Explain how the real economy works in the long run and how inflation and money growth is related. LO4. Interpret the theory of the open economy.

İçerik	Ders ECON 101 - Ekonomi Bilimini Keşfetmek I dersinin devamı olarak tasarlanır. Üretim, istihdam, işsizlik, faiz oranları, enflasyon ve ekonomik büyüme gibi temel makroekonomik kavramlar tanıtılır. Dersin sonunda öğrencilerin başlıca ekonomik kurumlar, piyasaların işleyişi, işsizlik ve enflasyon düzeylerini etkilemek için politika kullanımında karşılaşılan zorluklar hakkında anlayış geliştirmeleri beklenir. Öğrencilere güncel ekonomik sistemin önemli kısımlarını tanımlayan ekonomik modeller ve bu modellerin mevcut ve yeni olaylara ve sorunlara uygulamaları tanıtılır.

Description	The course is designed as an introduction to microeconomic theory at undergraduate level. Mainly, a framework for understanding fundamental theories on individuals' economic actions and decisions, basic production and consumption theories, and equilibrium concepts are introduced throughout the course with timely references to real time examples. In the final section of the course, market demand and equilibrium are examined as an introduction to more advanced topics.
Objectives	Developing an intermediate understanding of the functioning of markets. Introducing consumer and producer theories. Analyzing the core concepts of demand, cost, utility and preferences.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Describe markets with their functioning. LO2. Illustrate basic applications of consumer and production theories. LO3. Examine axioms of preferences, marginal rate of substitution and Slutsky equation. LO4. Analyze market demand and equilibrium.

Level/Year	Undergraduate/2
Type	Compulsory
Prerequisites	ECON 201
Description	The course is designed to introduce advanced microeconomic theories at undergraduate level with applications to individual decision making, market supply and demand, market equilibrium, uncertainty, and firm supply. Decision making under uncertainty and the role of technology in production processes are analyzed throughout the course. As an advanced microeconomics course at undergraduate level, discussions on welfare and externalities are also included in the content.
Objectives	Developing microeconomic theory further with analyses of complex economic systems. Introducing uncertainty and technology into microeconomic models. Examining the core concepts of welfare and externalities.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Describe market equilibrium. LO2. Analyze uncertainty and preferences under uncertainty. LO3. Assess technology and technology with two inputs. LO4. Solve profit maximization and cost minimization problems. LO5. Evaluate welfare under monopoly.

Description	Course is designed as a further introduction to macroeconomic theory built upon the foundations of basic macroeconomics at undergraduate level. Students are introduced to basic macroeconomic models to understand how the aggregated decisions of households, enterprises and the state influence national income, employment, price level, interest rates, and other related macroeconomic variables. Furthermore, these models are applied to understand the tools of monetary and fiscal policy, and to analyze problems such as unemployment and inflation.
Objectives	Defining the system of national income accounting. Introducing basic macroeconomic models. Introducing monetary and fiscal policy. Providing theories to analyze economic issues such as unemployment, inflation, and economic growth.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Interpret variables and components of national income accounting. LO2. Use basic macroeconomic models. LO3. Analyze and explain examples of the use of monetary and fiscal policy. LO4. Apply macroeconomic theories to analyze unemployment, inflation, economic growth, etc.

Prerequisites	ECON 203
Description	In this course, macroeconomic theory is studied further in connection with ECON 203 - Macroeconomics I. The aim is to present existing knowledge on modern macroeconomic theories and their applications. Basic macroeconomic models introduced previously are extended to include the long-run equilibrium, the influence of expectations and the analysis of open economy. Furthermore, the consequences of these factors for economic policies are examined.
Objectives	Introducing the long-run analysis of the economy. Illustrating the importance of expectations. Integrating the open economy into the macroeconomic model. Deepening the analysis of economic policies.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> L01. Analyze economies in the long-run perspective. L02. Include the factor of expectations in basic macroeconomic analysis.

L03. Analyze economic problems within the frame of an open economy.  
L04. Apply advanced macroeconomic models on questions of economic policy.

Name	<b>Statistics I</b>
Hour per week	3 (3+0)
Credit	3
ECTS	5
Level/Year	Undergraduate/2
Type	Compulsory
Prerequisites	-
Description	Course is designed as an introduction to basics of data science. It is aimed to underline the importance of data analysis and to examine basic methods of data analysis and interpretation, basic probability concepts, random variables

	and their real-life applications. In addition, discrete and continuous random variables such as Bernoulli, binomial, Poisson, normal and standard normal random variables are examined. Concepts including displaying and describing data, the normal distribution, probability, statistical inference, confidence intervals, and hypothesis tests with their real-life applications are discussed. Students are also directed to analyze small data sets using computer methods.
Objectives	Introducing the role of statistics in research and economics. Improving students' skills in data gathering and analysis. Introducing interpretations of statistical results. Providing background and foundational knowledge to support further studies in economic and econometric applications.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Summarize descriptive statistics. LO2. Use statistical software to analyze the topics which will be discussed during the course. LO3. Explain point estimates for unknown parameters of distributions. LO4. Calculate confidence intervals for unknown parameters of distributions. LO5. Analyze hypothesis testing with one or two samples.

Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/2
Type	Compulsory
Prerequisites	ECON 205
Description	Course is designed as a continuation of ECON 205 - Statistics I and it is focused on the broad treatment of applications of statistics, concentrating on techniques used in economics. Subjects such as sampling distributions, one-sample and two-sample hypothesis tests, confidence intervals, chi-square tests, and simple and multiple linear regression are examined throughout the course. It is also aimed to show how to define, collect, organize, visualize and analyze data for an economics problem using statistical techniques. Computer implementations with up-to-date statistical software are also included in the course content.
Objectives	Introducing the role of statistics in research and economics. Improving students' skills in data gathering and analysis. Showing how to interpret statistical results. Providing background and foundational knowledge to support further studies in economic and econometric applications.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> L01. Describe types of hypotheses testing with two samples. L02. Interpret chi-square probability distribution as the sample size changes. L03. Analyze basic concepts in linear regression and correlation. L04. Examine F-Distribution and the one-way ANOVA. L05. Apply Multiple Regression Analysis.

İçerik	Ders ECON 205 - İstatistik I dersinin devamı niteliğinde tasarlanır ve dersin odağı, özellikle ekonomide kullanılan teknikler dikkate alınarak istatistik uygulamalarının geniş bir şekilde ele alınmasıdır. Derste örnekleme dağılımları, tek ve iki kitle için hipotez testleri ve güven aralıkları, ki-kare bağımsızlık testi ve basit ve çoklu doğrusal regresyon modelleri gibi konular incelenir. Ayrıca istatistiksel teknikleri uygulayarak bir ekonomi problemi için verilerin nasıl tanımlanacağı, toplanacağı, organize edileceği, görselleştirileceği ve analiz edileceğinin gösterilmesi amaçlanır. Ek olarak, ders içeriğinde güncel istatistiksel yazılımları kullanan bilgisayar uygulamaları yer alır.

**COURSE RECORD**

Code	<b>ECON 208</b>
Name	<b>History of Economics</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/2
Type	Compulsory
Prerequisites	-
Description	The course aims to augment students' understanding of economics acquired in previous courses by delving into the key milestones in the evolution of the field. It broadly explores the development of economic theories, investigating the conditions under which they emerged, the order of their evolution, and the questions to which they responded. The emphasis is on historical subjects and aspects within economic theories, including the classical school of thought, marginal utility theory, and Keynesian ideas. Throughout the course, there is a focus on illustrating how real socio-economic phenomena influence the progression of economic theory.
Objectives	Showing examples of theories that differ from modern mainstream theory and showing that the theoretical basis of economics has been, and is still being, contested.

	<p>Providing knowledge about the development of economics in historical/chronological context.</p> <p>Introducing the major ideas associated with each group or thinker studied, and thereby help students better comprehend the origins of contemporary theory.</p>
Learning Outcomes	<p><i>By the end of the course, the student will be able to</i></p> <p>LO1. Describe the historical roots of current economic concepts.</p> <p>LO2. Explain the evolution of economics as a science.</p> <p>LO3. Summarize Adam Smith's, David Ricardo's, and Karl Marx's contributions to the theory of the market.</p> <p>LO4. Show mechanisms behind the marginal utility theory.</p> <p>LO5. Distinguish the differences and similarities between Keynesian ideas and classical theory.</p> <p>LO6. Analyze thoughts of different types of schools/thinkers such as Keynesian, Ricardian, classical and neoclassical schools.</p>

İçerik	Ders, öğrencilerin önceki ekonomi derslerinde edindikleri bilgileri artırmayı amaçlamaktadır. Bu amacı gerçekleştirmek için, ekonominin evrimindeki önemli kilometre taşlarını detaylı bir şekilde incelemektedir. Genel olarak, ekonomik teorilerin gelişimini, ortaya çıktıkları koşulları, evrim sıralarını ve

yanıt verdikleri soruları araştırmaktadır. Klasik düşünce okulu, marjinal fayda teorisi ve Keynesçi düşünceler gibi ekonomik teorilerdeki tarihsel konulara ve yönlelere özel bir vurgu yapmaktadır. Ders boyunca, gerçek sosyo-ekonomik olayların ekonomik teorinin evrimini nasıl etkilediğini göstermeye odaklanılmaktadır.

### COURSE RECORD

Code	<b>ECON 209</b>

Type	Elective
Prerequisites	-
Description	The course is designed as an introductory course on programming with Python. It is designed for students with little or no programming experience with Python or with other programming languages. The content mainly includes necessary subjects to write non-complex codes/programmes with Python. Algorithm development, data types, expressions and arithmetic operations, conditional statements and designing programmes with functions are covered.
Objectives	Introducing the main concepts of programming. Providing knowledge about essential subjects of programming with Python. Introducing different types of algorithms and ways to code programmes with Python.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Explain the main topics, basic concepts and terminology of programming. LO2. Develop algorithms based on their needs. LO3. Apply algorithms on Python. LO4. Code short programmes on Python.

ECTS	4
Level/Year	Undergraduate/2,3,4
Type	Compulsory / Elective (May change depending on departments of engineering)
Prerequisites	-
Description	The course aims to introduce the principal concepts of microeconomics, targeted towards engineering undergraduate students, through specifically examining topics that are of special interest for production and technology firms and markets. Subjects such as preferences, various production and cost functions, market structures, externalities, categories of goods and products are examined. At the same time, a sample of macroeconomic concepts that are essential to understand the modern economy are also examined.
Objectives	Introducing basics of economic thinking. Introducing basic microeconomic models. Providing basic tools to analyze products and markets from an economic point of view. Developing students' awareness of economic aspects of global issues.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Explain variations of basic economic models. LO2. Analyze products and markets using basic economic models. LO3. Analyze some global issues, such as environmental problems and common resources, from an economic point of view. LO4. Discern between positive and normative economic questions.

Dersin Dili	İngilizce
Tip	Zorunlu / Seçmeli (İlgili mühendislik bölümlerine göre değişken)
Ön Şart	Yok
İçerik	Dersin amacı mikroekonominin temel kavramlarının mühendislik bölümleri öğrencilerine yönelik olarak, özellikle üretim ve teknoloji şirketlerini ve pazarlarını ilgilendiren konular ele alınarak giriş düzeyinde tanıtılmasıdır. Tercihler, çeşitli üretim ve maliyet fonksiyonları, pazar yapıları, dışsallık, mal ve ürün çeşitleri gibi konular incelenir. Derste aynı zamanda modern ekonomiyi anlamaya yönelik bazı makroekonomik kavramlar incelenir.

**COURSE RECORD**

Code	<b>ECON 299</b>
Name	<b>Voluntary Internship</b>
Hour per week	2 (0 + 2)
Credit	1
ECTS	5
Level/Year	Undergraduate /2, 3, 4
Type	Elective
Prerequisites	To have successfully completed 60 ECTS of courses in the Economics Department
Description	This course provides students with the opportunity to explore the real work environment and experience sectors that align with their interests. While discovering industries, students also get a chance to observe how economic theory is applied in practice. The course is designed to equip students for a more prepared start to their professional careers after graduation.

Objectives	Learning and selecting business sectors that align with the learner's skills and interests. Seizing the opportunity to observe the real-life applications of the discipline of Economics.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Relate theoretical knowledge to practical challenges that are faced in the business environment. LO2. Match necessary skills and knowledge to professional areas. LO3. Examine application areas of practical knowledge that are not explicitly taught in the curriculum. LO4. Use knowledge and experience pertaining to working environments of graduates of economics and related disciplines.

Kredi	1
AKTS	5
Seviye/Yıl	Lisans/2, 3, 4
Dersin Dili	İngilizce
Tip	Seçmeli
Ön Şart	Ekonomi Bölümü'ndeki 60 AKTS'lik dersi başarı ile tamamlamış olmak
İçerik	Bu ders, öğrencilere gerçek iş ortamını keşfetme ve ilgi alanlarına uygun sektörleri deneyimleme imkânı sunar. Öğrenciler, kendi ilgi alanlarına ve becerilerine uygun iş sektörlerini keşfederken, ekonomik teorinin pratikte nasıl uygulandığını gözlemleme fırsatına sahip olur. Aynı zamanda, bu süreç öğrencilere iş dünyasının dinamiklerini daha iyi anlama ve bu alanda nasıl etkili olabileceklerini keşfetme şansı tanır. Ders, öğrencilerin mezuniyet sonrası iş hayatlarına daha donanımlı bir başlangıç yapmalarını sağlamak amacıyla kapsamlı bir perspektif sunar.

**COURSE RECORD**

Code	<b>ECON 301</b>
Name	<b>Econometrics I</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3
Type	Compulsory
Prerequisites	ECON 205
Description	Statistics and econometrics knowledge that is necessary to understand and conduct econometric analysis is developed throughout the course at advanced undergraduate level. Simple and multiple linear regression models are examined in detail with related subjects such as dummy variables, omitted variable bias, interpretation of partial regression coefficients, model evaluation and goodness of fit criteria. In addition, classical assumptions of linear regression models are tested and examined.
Objectives	Introducing hypothesis testing, estimation and inference. Showing how to analyze and test economic theory with empirical data.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Test economic hypotheses and check significance properties. LO2. Construct a novel econometric model and test overall performance of the model. LO3. Calculate simple and partial correlations between variables within a model. LO4. Choose appropriate functional form in regression models.

İçerik	Derste ekonometrik analizi anlamak ve ekonometrik analiz yapabilmek için gerekli olan temel istatistik ve ekonometri bilgisi ileri lisans düzeyinde geliştirilir. Basit ve çoklu doğrusal regresyon modelleri kukla değişkenler, dışlanmış değişken yanlılığı, basit ve kısmi regresyon katsayılarının yorumlanması, model değerlendirme ve uyum iyiliği gibi ilgili alt konuları ile ayrıntılı olarak incelenir. Ayrıca, doğrusal regresyon modelinin klasik varsayımları incelenir ve test edilir.

**COURSE RECORD**

Code	<b>ECON 302</b>
Name	<b>Econometrics II</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3
Type	Compulsory
Prerequisites	ECON 301
Description	Statistics and econometrics knowledge that is necessary to understand and conduct econometric analysis is developed further as a continuation of ECON 301 – Econometrics I. Examinations of basic and common time series models and their widely used estimation methods are included in course content. Classical assumptions of consistent and efficient parameter estimations of linear models are assessed. In addition, relaxation of these assumptions and some example methods for more convenient inference are discussed.
Objectives	Introducing time series data and simple and multiple linear regression techniques for its analysis. Showing how to identify the violation of linear model classical assumptions in time series setting. Introducing diagnostic testing methods for better econometric model specifications.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Apply diagnostic testing for econometric model specification in time series models. LO2. Determine the measurement errors in model's functional forms in time series estimations. LO3. Detect the presence of omitted and unnecessary variables in time series models. LO4. Choose appropriate model to remedy autocorrelated error-term problem.

Haftalık Saati	3 (3 + 0)
Kredi	3
AKTS	5
Seviye/Yıl	Lisans/3
Dersin Dili	İngilizce
Tip	Zorunlu
Ön Şart	ECON 301
İçerik	Derste ekonometrik analizi anlamak ve ekonometrik analiz yapabilmek için gerekli olan temel istatistik ve ekonometri bilgisi ECON 301 - Ekonometri I dersinin devamı olarak geliştirilir. Ders içeriğinde temel ve yaygın zaman serisi modelleri ile bunların yaygın olarak kullanılan tahmin yöntemleri bulunur. Tutarlı ve etkin parametre tahmininin klasik varsayımları değerlendirilir. Ek olarak bu varsayımların sağlanmadığı durumlar ve daha uygun istatistiksel çıkarımların yapılabileceği bazı örnek yöntemler tartışılır.

### COURSE RECORD

Code	<b>ECON 303</b>
Name	<b>International Economics</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3
Type	Compulsory
Prerequisites	ECON 102
Description	The course is designed to help students gain a thorough understanding of micro and macro foundations of international economics. Subjects include theoretical foundations and history of how international economics developed, theoretical contributions on international economics and international economics theories, trade and competition, effects of wage and labor on trade, effects of exchange rate policies on trade and examination of dynamic relations between exports and imports.
Objectives	Defining main concepts of international economics. Introducing main theories of international trade. Introducing theories to analyze the effects of exchange rate policies on trade.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Interpret the main concepts of international economics.

L02. Provide theoretical foundations and explanations of international trade and competition.  
 L03. Explain how exchange rate policies affect international trade.  
 L04. Apply one or several of the existing theories to predict changes in imports and exports.

Ön Şart	ECON 102
İçerik	Ders öğrencilerin uluslararası ekonominin mikro ve makro temelleri üzerine kapsamlı bir anlayış geliştirmelerini sağlamak üzere tasarlanmıştır. Örnek konular uluslararası ekonominin teorik temelleri ve tarihsel gelişimi, uluslararası ekonomiye teorik katkılar ve uluslararası ekonomi teorileri, dış ticaret ve rekabet, ücret ve işgücünün ticarete etkisi, döviz kuru politikalarının ticarete etkisi, ihracat ve ithalat arasındaki dinamik ilişkilerin incelenmesini içerir.

**COURSE RECORD**

Code	<b>ECON 304</b>
Name	<b>Industrial Organization</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3
Type	Compulsory

Prerequisites	ECON 305
Description	The course is designed to examine subjects, in addition to subjects of ECON 201 - Microeconomics I and ECON 202 – Microeconomics II, that are related to comparatively more realistic analyses of current markets. Markets and particularly competition, when assumptions of perfect competition do not hold, are examined. Subjects such as imperfect competition, oligopoly theory, quantity and price competition, vertical and horizontal market relations, advertising and other marketing tools are examined.
Objectives	<p>Providing an understanding of the key functionings of markets and competition.</p> <p>Introducing imperfect competition conditions where firms hold market power.</p> <p>Defining classical models of duopoly including Cournot, Bertrand, Hotelling and Stackelberg models.</p> <p>Introducing vertical and horizontal product differentiation.</p>
Learning Outcomes	<p><i>By the end of the course, the student will be able to</i></p> <p>L01. Compare perfect and imperfect competition market conditions.</p> <p>L02. Discuss the implications of imperfect competition on welfare.</p> <p>L03. Find Nash Equilibrium quantities and prices in Cournot, Bertrand, Hotelling and Stackelberg settings.</p> <p>L04. Design competition models where few firms interact under vertical and horizontal product differentiation and with capacity constraints.</p>

Haftalık Saati	3 (3 + 0)
Kredi	3

AKTS	5
Seviye/Yıl	Lisans/3
Dersin Dili	İngilizce
Tip	Zorunlu
Ön Şart	ECON 305
İçerik	Ders, ECON 201 - Mikroekonomi I ve ECON 202 - Mikroekonomi II derslerine ek olarak mevcut pazarların görece daha gerçekçi analizi ile ilgili konuların inceleneceği biçimde tasarlanır. Pazar koşulları ve özellikle rekabet konusu mükemmel rekabet varsayımlarının geçerli olmadığı durumlarda analiz edilir. Eksik rekabet, oligopol teorisi, miktar ve fiyat rekabeti, dikey ve yatay pazar ilişkileri, reklam ve diğer pazarlama araçları ve benzer konular incelenir.

### COURSE RECORD

Code	<b>ECON 305</b>
Name	<b>Game Theory for Economists</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3
Type	Compulsory
Prerequisites	ECON 101
Description	Course is designed as a general introduction to game theory and Nash equilibrium concepts with timely references to real life examples from various disciplines. It is aimed to construct a game theoretical platform that presented a playing field where well-known games from tennis to chess are reconstructed and that provides a solid basis for understanding complex phenomena in daily lives of individuals, firms or other economic agents. Solutions to simultaneous and sequential games are introduced on the bases of backward induction method, best-response analysis, maximin-minimax methods for zero-sum games, and sub-game perfect equilibrium.
Objectives	<p>Providing comprehensive knowledge on the types of games.</p> <p>Introducing the concept of Nash Equilibrium.</p> <p>Developing hands on experience on the construction of games for various interactions.</p> <p>Developing a game theoretical basis for analyzing, understanding and predicting the outcomes of various interactions.</p>
Learning Outcomes	<p><i>By the end of the course, the student will be able to</i></p> <p>L01. Distinguish simultaneous and sequential games.</p> <p>L02. Determine Nash equilibria in various types of games.</p> <p>L03. Develop games out of scenarios, where interaction takes place between individuals, firms or machines, by constructing decision trees or matrices.</p> <p>L04. Analyze basic games in a way to predict outcomes.</p>

İsmi	<b>Ekonomistler için Oyun Teorisi</b>
Haftalık Saati	3 (3 + 0)
Kredi	3
AKTS	5
Seviye/Yıl	Lisans/3
Dersin Dili	İngilizce
Tip	Zorunlu
Ön Şart	ECON 101
İçerik	Ders çeşitli disiplinlere uygulanan gerçek yaşam örneklerine güncel referanslar verilerek oyun teorisine ve Nash dengesi kavramına genel giriş niteliğinde tasarlanır. Ders süresince tenisten satranca kadar iyi bilinen oyunların yeniden inşa edildiği bir oyun alanı sunmak ve bireyler, firmalar ve diğer ekonomik birimlerin günlük hayatlarındaki ve çalışma alanlarındaki karmaşık olayların anlaşılması için bir temel sağlamak üzere oyun teorisi kapsamında bir platform inşa edilmesi amaçlanır. Eşzamanlı ve sıralı oyunlar için çözümler, geriye yönelik tümevarım, en iyi cevap analizi, sıfır toplamlı oyunlar için maximin-minimax yöntemleri ve alt oyun mükemmel dengesi temelinde sunulur.

**COURSE RECORD**

Code	<b>ECON 306</b>
Name	<b>Labor Economics</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3
Type	Compulsory

Prerequisites	-
Description	The course is designed as an introductory course of labor economics at undergraduate level. Subjects such as the distribution, development and pricing of human resources, employment, unemployment, and related subjects are examined from the perspectives of welfare maximization on the side of labor force and profit maximization on the side of firms. In addition, responses and statuses of employee and employers in response to government policies, demographic changes, and other related conditions are examined through analytical methods based on microeconomic theory.
Objectives	Defining main concepts in labor economics. Providing a basis for understanding the labor supply and demand concepts and how labor markets work. Describing human resource policies to incentivize workers.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Define main topics, basic concepts and terminology of labor economics. LO2. Discuss the theoretical background of how labor markets work. LO3. Explain job searching behaviors. LO4. Discuss a few example applications of human resources management.

İçerik	Ders çalışma ekonomisine lisans düzeyinde giriş dersi olarak tasarlanır. Derste insan kaynaklarının gelişimi, dağılımı, ücretlendirilmesi, istihdam, işsizlik ve ilgili konular çalışanların refahlarını, firmaların ise karlarını maksimize etmeyi amaçladıkları hipotezleri dikkate alınarak incelenir. Ek olarak, işveren ve

çalışanların devlet politikaları, demografik değişimler ve diğer ilgili şartlar karşısında durumları ve yanıtları mikroekonomiye dayanan analitik yöntemlerle incelenir.

### COURSE RECORD

Code	<b>ECON 307</b>
Name	<b>Behavioral Economics</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3
Type	Compulsory
Prerequisites	-
Description	Focus of the course content is taken as methodological discussions in classical economics. Neoclassical vs. mainstream assumptions for decision making processes of economic agents are discussed. Rationality assumption is discussed among initial topics. Behavioral decision theory, social preferences, time preferences, behavioral game theory, bounded rationality, and recent subjects and developments in fields of behavioral economics and experimental economics in relation to behavioral economics are also examined.
Objectives	Introducing theories of behavioral economics. Providing knowledge on the fundamental assumptions of neoclassical economics. Showing examples of how behavioral economic theory modified decision making models in economics.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> L01. Demonstrate knowledge about concepts and subjects of behavioral economic theory. L02. Discuss methodological issues in economics. L03. Interpret the importance of the assumptions used in economic theory. L04. Evaluate the contribution of behavioral economics in the field of economics and in other fields.

AKTS	5
Seviye/Yıl	Lisans/3
Dersin Dili	İngilizce
Tip	Zorunlu
Ön Şart	Yok
İçerik	Ders konularının odağı klasik ekonomi yaklaşımındaki yöntemsel tartışmalar olarak belirlenir. Ekonomik aktörlerin karar alma süreçlerindeki neoklasik ve ana akım ekonomik varsayımlar tartışılır. Ders konularına karar alma mekanizmasındaki rasyonalite varsayımı tartışılarak başlanır. Ek olarak, davranışsal karar alma teorisi, sosyal tercihler, zaman tercihleri, davranışsal oyun teorisi, sınırlı rasyonalite, davranışsal ekonomi alanındaki ve deneysel ekonomi alanında davranışsal ekonomi ile bağlantılı olan güncel konular ve gelişmeler incelenir.

**COURSE RECORD**

Code	<b>ECON 321</b>
Name	<b>Mathematical Economics</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3
Type	Compulsory
Prerequisites	ECON 101
Description	The main purpose in the course is to examine principal and basic tools of mathematical approaches used in economic analyses. Fundamental principles that are needed for understanding and analyzing main economic theories and empirical analyses are presented in the course content and are examined from a mathematical perspective. Example subjects include introduction to abstract mathematics, optimization problems and their analyses, comparative static analysis, basic linear algebra, introduction to difference and differential equations.
Objectives	Introducing mathematical foundations used in advanced economic theories. Illustrating how to use basic mathematical approaches in economic analysis. Providing examples of advanced mathematical applications used in economic models.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Explain mathematical applications in economic theories. LO2. Interpret economic implementations of mathematical models. LO3. Discuss presenting a mathematical proof. LO4. Solve economic models using mathematical tools.

Tip	Zorunlu
Ön Şart	ECON 101
İçerik	Dersin temel amacı ekonomik analizlerde kullanılan matematiksel yaklaşımların başlıca ve temel araçlarının incelenmesidir. Ders içeriğinde ekonomik teorileri ve ampirik analizleri anlamak ve analiz etmek için gerekli olan temel prensipler bulunur ve matematiksel açıdan incelenir. Örnek konular: soyut matematiğe giriş, optimizasyon problemlerinin kurulumu ve analizi, karşılaştırmalı statik analiz, basit lineer cebir, diferansiyel denklemlere giriş.

**COURSE RECORD**

Code	<b>ECON 325</b>
Name	<b>Selected Topics in International Trade</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3,4
Type	Elective
Prerequisites	-
Description	Aim of the course is to introduce the subject of international trade as a subdiscipline in economics. 5-6 foundational subjects in international trade are examined at introductory level. Causes and consequences of international trade and investment are discussed throughout the course. Questions such as

	why nations trade, what they trade, who gains (or not) from trade are also investigated. In addition, the development of the basis of trade are be examined using comparative and absolute advantage concepts, partial and general equilibrium analysis, the Heckscher-Ohlin model, and intra-industry trade theories.
Objectives	Showing examples of how international trade affects economic development, international politics and conflicts, and the environment. Introducing trade policy and the economic effects of different trade policy instruments. Examining the factors that influence international trade patterns and their impacts on income distribution between and within countries.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Describe the comparative advantages theory, absolute advantage theory, the supply and demand models on the basis of analyses of international trade theory. LO2. Discuss the relationship between trade theory and economic development. LO3. Examine the internal and external equilibria in the context of foreign trade and national income. LO4. Analyze the foreign trade of the less developed and developed countries. LO5. Examine the new trade theories and the factor endowments theory.

İçerik	Dersin amacı ekonomi biliminin bir alt alanı olarak uluslararası ticaretin tanıtılmasıdır. Derste uluslararası ticaret alanındaki 5-6 temel konu giriş düzeyinde incelenir. Ders süresince uluslararası ticaretin ve yatırımın neden ve sonuçları tartışılır. Ülkeler neden ticarete girer, ticarete konu mallar nelerdir, ticaretten hangi taraf kazanç sağlar (ya da zarar eder) gibi sorular da ayrıca incelenir. Ek olarak, ticaret zemininin gelişimi karşılaştırmalı ve mutlak üstünlük, kısmi ve genel denge analizi, Heckscher-Ohlin modeli ve endüstriler arası ticaret teorileri kullanılarak incelenir.

**COURSE RECORD**

Code	<b>ECON 326</b>
Name	<b>Selected Topics in Behavioral Economics</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3,4
Type	Elective
Prerequisites	-
Description	Course is aimed at examining a variety of different concepts in behavioral economics at introductory and undergraduate level in order to introduce the area further and in addition to the contents of core courses in curriculum. Example topics can be: classical utility theory, alternative utility theories, decision-making under risk and uncertainty, behavioral game theory, trust and reciprocity, economics and psychology, behavioral public policy, and experimental methods. Students are presented with the possibility to gain thorough knowledge about main subjects and approaches in behavioral economics, and to discuss and compare these with subjects and approaches in classical and mainstream economics.
Objectives	Introducing the rapidly evolving literature of behavioral economics. Showing how to use behavioral economic theory tests using field experiments and non-experimental data. Developing skills for using concepts and applications of behavioral economics in order to explain anomalies in real world market environments.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Summarize subjects in the field of behavioral economics. LO2. Describe the differences between classical and behavioral economics. LO3. Evaluate the most suitable methods for approaching a given topic. LO4. Examine the findings from behavioral economics research.

Code	<b>ECON 327</b>
Name	<b>Introduction to Forecasting for Economics and Business</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3,4
Type	Elective
Prerequisites	-
Description	The aim of this course is to teach students the construction of mathematical models for problems in business and economics, to introduce forecasting and forecasting methods, and to develop their skills in interpreting the results of estimation analysis. The course aims to develop students' ability to solve problems they will encounter in the fields of economics and business mathematically and enable them to make effective predictions about real-world events.
Objectives	Teaching the mathematical infrastructure of forecasting. Providing knowledge of the use of mathematics in business life and economics.

	Teaching popular forecasting techniques used in business, economic and social sciences.
	Developing students' mathematical modelling skills, enabling them to make forecasting using related software, and gaining the skills to interpret the predictions correctly.
Learning Outcomes	<p><i>By the end of the course, the student will be able to</i></p> <p>L01. Relate mathematical tools and concepts with economic and economic problems.</p> <p>L02. Provide solutions to real-life problems by utilizing mathematical models and forecasting analysis methods.</p> <p>L03. Make forecasting analyses using relevant software.</p> <p>L04. Interpret the results of forecasting analyses.</p> <p>L05. Explain the meaning of forecasting in the context of business, economics, and related fields</p>

İçerik	Bu dersin amacı, işletme ve ekonomi bilim dallarındaki problemler için matematiksel model oluşturma ve öğrencilere öğretilmesi, ileri tahmin ve ileri tahmin yöntemlerinin tanıtılması ve tahmin analizlerinin sonuçlarını yorumlama becerilerinin geliştirilmesidir. Ders, öğrencilerin ekonomi ve işletme alanlarında karşılaşacakları problemleri matematiksel olarak çözme becerilerini yapabilmelerini sağlamayı amaçlamaktadır.

**COURSE RECORD**

Code	<b>ECON 332</b>
Name	<b>Microeconometrics</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3,4
Type	Elective
Prerequisites	-
Description	Aim of the course is to analyze basic topics in microeconometrics in detail at undergraduate level. The course content includes standard econometric techniques that are used to examine micro-level data. Example subjects are generalized method of moments (GMM), instrumental variable (IV), two stage least squares (2SLS), discrete choice, and causal effects estimation techniques. Upon completing the course students are expected to be able to identify micro-data, problems that should be analyzed with micro-data and suitable techniques of estimation based on the question and data of interest.
Objectives	Preparing students for conducting independent research and analysis using empirical methods. Introducing econometric methods that are frequently used in applied microeconomic research. Reviewing standard techniques for cross-sectional analysis and presenting modern approaches.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Demonstrate an understanding of basic models and methods of microeconometrics. LO2. Analyze widely used types of micro-data using statistical software. LO3. Formulate a coherent research design to test empirical questions. LO4. Conduct simple examples of microeconomic empirical analysis.

İçerik	Derste mikroekonometri alanındaki temel konuların lisans düzeyinde ve ayrıntılı olarak incelenmesi amaçlanır. Ders içeriğinde GMM, IV ve 2SLS, ayırık seçim-logit ve probit modelleri, nedensel etki tahmin teknikleri ve ilgili konular yer alır. Dersi tamamlayan öğrencilerin mikro-verileri tanımlayabilmeleri ve ayırt edebilmeleri, mikro-veri ile analiz edilmesi mümkün olan ve gereken problemleri tanımlayıp ayırt edebilmeleri ve ayrıca ilgilenilen soru ve veri kümesi ile bağlantılı olarak uygun tahmin tekniklerini tanımlayıp ayırt edebilmeleri beklenir.

**COURSE RECORD**

Code	<b>ECON 334</b>
Name	<b>Personnel Economics</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/2,3,4
Type	Elective
Prerequisites	-
Description	The course is designed as an introductory course on economic analysis of human resource management policies. In particular, the course content contains two main issues of human resource management: personnel selection and personnel motivation. Theoretical framework based on labor economics as well as empirical studies related to behavioral economics and experimental economics are examined throughout the course. By the end of the course students will have acquired knowledge on the basic terminology and concepts in the field of personnel economics and human resources management.
Objectives	Introducing the main concepts of labor economics. Introducing the subject of personnel behavior. Examining different types of compensation systems and how to increase personnel performance in these systems.

	Showing examples of experimental and behavioral studies that are conducted in workplaces and are related to human resource management.
Learning Outcomes	<p><i>By the end of the course, the student will be able to</i></p> <p>LO1. Define the main topics, basic concepts and terminology of labour economics and human management policies.</p> <p>LO2. Interpret the theoretical knowledge on how personnel make decisions related to job seeking and working behaviour.</p> <p>LO3. Categorize different compensation schemes and their effects on personnel performance.</p> <p>LO4. Discuss the effects of training and education on personnel behavior.</p>

İçerik	Ders, insan kaynakları yönetimi politikalarının ekonomik analizine giriş dersi niteliğinde tasarlanır. Özel olarak ders içeriğinde, insan kaynakları yönetimi alanındaki iki temel konu bulunur: personel seçimi ve personel motivasyonu. Ders süresince çalışma ekonomisine dayalı teorik çerçeve ile davranışsal ekonomi ve deneysel ekonomiye dayanan ampirik çalışmalar incelenir. Dersin sonunda öğrenciler personel ekonomisi ve insan kaynakları yönetimi alanlarındaki temel terminoloji ve kavramlar hakkında bilgi edinmiş olurlar.

**COURSE RECORD**

Code	<b>ECON 335</b>
Name	<b>Institutional Economics</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/2,3,4
Type	Elective
Prerequisites	ECON 101
Description	The course is focused on “new institutional economics” with an emphasis on the influence of institutions and institutional know-how and behavior on economic performance. Students are introduced to concepts of institutions, organizations, property rights and transaction costs. Effects of these on workings of firms, markets, states, and on economic growth are also analyzed. In addition, influence of institutions on some example social issues such as environmental problems and crime are also discussed.
Objectives	Introducing the most important concepts of institutional economics. Introducing the analysis of firms and markets from an institutional economics point of view. Introducing the analysis of the economic development of a country from the point of view of institutional economics. Introducing the institutional economic analysis of some example social issues.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Apply the most important concepts of institutional economics. LO2. Analyze firms and markets from an institutional economics point of view. LO3. Analyze the economic development of a country from the point of view of institutional economics. LO4. Transfer the institutional economic analysis on some example social issues.

Ön Şart	ECON 101
İçerik	Ders “yeni kurumsal iktisat akımı” odak noktası alınarak ve kurumların ve kurumsal bilgi birikimi ve davranışların ekonomik performans üzerindeki etkileri dikkate alınarak tasarlanır. Derste öğrencilere kurumlar, organizasyonlar, mülkiyet hakları ve işlem maliyeti kavramları tanıtılır. Bu kavramların firmaların, piyasaların ve devletlerin işleyişi üzerindeki etkilerinin yanında ekonomik büyüme üzerindeki etkileri de incelenir. Ek olarak, kurumların çevre problemleri ve suç gibi bazı örnek toplumsal sorunlar üzerindeki etkileri de tartışılır.

**COURSE RECORD**

Code	<b>ECON 338</b>
Name	<b>Monetary Theory, Policy and Banking</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3,4
Type	Elective
Prerequisites	-
Description	The course is designed to develop students’ abilities to understand the functions of and to analyze monetary policies and the banking system. Subjects such as monetary theory, monetary policy, banking and banking types, interest rate hypotheses, inflation, exchange rate, financial markets, central bank and its functions are examined. In addition, it is aimed to increase and deepen students’ interest in monetary and financial issues found both in the literature and in real life throughout the course.
Objectives	Introducing the mechanics of financial markets. Introducing theories on why money is important for inflation, economic activity and interest rates. Defining major money and capital market instruments.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Discuss how money demand responds to changes in interest rates and income level. LO2. Provide explanations for how monetary policy guides economic activity and prices. LO3. Measure the term structure of interest rates. LO4. Assess the effects of different exchange rate regimes on macroeconomic policy implementations.

İçerik	Derste, benzer diğer amaçların yanında, Türkiye ekonomisinin günümüze kadar kronolojik olarak incelenmesi ve böylece ekonominin uygulama alanlarından ilgili olanların Türkiye örneği ile incelenmesi amaçlanır. 1800'lü yıllardan başlayarak Türkiye ekonomisi ve ekonomi ile ilgili reformlar, ekonomik krizler, kurumsal politikalar, enflasyon hedeflemesi politikaları, merkez bankası kuruluşu ve tarihi, döviz kuru politikaları ve ilgili konular incelenir.

**COURSE RECORD**

Code	<b>ECON 343</b>
Name	<b>Economy of the Middle East</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	4
Level/Year	Undergraduate/2,3,4
Type	Elective
Prerequisites	-
Description	Course is designed as an introduction to economies of Middle East and Northern Africa (MENA). The regional economics, economic history, economic institutions, and resources that are characteristic for individual and for groups of MENA countries as well as methods used to analyze these subjects are examined. In addition, the concept and theory of "rentier state" is introduced. Knowledge about how these different factors influence each other is presented to enable students to understand the economic development in the region and to gain an understanding of what to take into consideration in business relations that include MENA countries.
Objectives	Reviewing the basic economic history of the Middle East and North Africa. Introducing different institutional settings of MENA countries. Providing knowledge on economic resources and related characteristics of the MENA region.

	Introducing economies of some selected MENA countries.
Learning Outcomes	<p><i>By the end of the course, the student will be able to</i></p> <p>LO1. Use the basic economic history of the MENA region to explain the region's past and current economy.</p> <p>LO2. Analyze the influences of the institutional settings of MENA countries on their economies.</p> <p>LO3. Analyze the influence of the resource characteristics of the MENA region on its economic development.</p> <p>LO4. Analyze economies of some specific MENA countries.</p>

Level/Year	Undergraduate/3,4
Type	Elective
Prerequisites	-
Description	Course is focused on the current methodological issues about the classical assumptions on economic agents built in neoclassical/mainstream economics. Subjects start with the main assumptions on decision-making such as rationality (rational choice) and common knowledge. Subjects of behavioral decision theory, social preferences, time preferences, behavioral game theory, bounded rationality are also introduced and related subtopics are examined. In addition, current developments in psychological and experimental studies are also discussed.
Objectives	Introducing neoclassical economic theory with its fundamental assumptions. Introducing behavioral economics as a subfield of economics. Providing knowledge on the methodological issues in the field of economics. Discussing the contributions of prospect theory and behavioral economics in the broader field of economics.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> L01. Demonstrate knowledge about economic theory. L02. Interpret the importance of the assumptions used in economic theory. L03. Understand how behavioral economic theory modified/updated the decision-making models in economics.

Assumptions on economic agents	L01, L02
Utility theories	L01, L02
Preferences: endowment effect, time consistency, self-control	L01, L02, L03
Basic and behavioral game theory	L02, L03
Preferences: other regarding, inequality aversion, bounded rationality	L01, L02, L03
Behavioral public policy, neuroeconomics	L01, L02, L03

**DERS BİLGİLERİ**

Kodu	<b>ECON 345</b>
İsmi	<b>Davranışsal Ekonomi</b>
Haftalık Saati	3 (3 + 0)
Kredi	3
AKTS	4
Seviye/Yıl	Lisans/3,4
Dersin Dili	İngilizce
Tip	Seçmeli
Ön Şart	Yok
İçerik	Ders klasik ekonomide ekonomik birimler üzerinde bulunan klasik varsayımlar ile ilgili güncel ve metodolojik konular odak alınarak tasarlanır. Ders konuları rasyonellik ve ortak bilgi gibi karar verme üzerindeki başlıca varsayımlar ile başlar. Ders süresince davranışsal karar alma teorisi, sosyal tercihler, zaman tercihleri, davranışsal oyun teorisi, sınırlı rasyonellik ve benzeri konular tanıtılır ve ilgili alt konular incelenir. Ek olarak psikolojik ve deneysel çalışmalarındaki güncel gelişmeler tartışılır.

**COURSE RECORD**

Code	<b>ECON 348</b>
Name	<b>Culture and Economy</b>
Hour per week	3 (3 + 0)
Credit	3

Type	Elective
Prerequisites	-
Description	The course aims to introduce and examine, at an introductory level, different approaches to define, measure and evaluate culture, cultural values and culture-specific concepts. Possible impacts of cultural values and worldviews on the development and structure of a national economy as well as the impacts of economic growth and development on culture are discussed. Principal knowledge and instruments that will help in international working environments are presented throughout the course.
Objectives	Developing curiosity regarding other cultures. Discussing some important dimensions of cultures in relation to economy. Presenting examples of how cultures influence economic growth and economic structures of countries. Providing knowledge about basic principles, methods and tools for analyzing problems in intercultural management settings.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Analyze culture and culture's influences as multi-dimensional phenomena. LO2. Analyze some of the important dimensions of culture. LO3. Explain the influence of culture on economic growth and economic structure. LO4. Suggest solutions for problems in intercultural management situations.

İçerik	Dersin amacı kültürü tanımlayan, kültürel değerleri ve kültürlere özel kavramları ölçen ve değerlendiren farklı yaklaşımların giriş düzeyinde tanıtılması ve incelenmesidir. Kültürel değerlerin ve dünya görüşünün milli ekonomik yapının oluşumu ve kalkınması üzerindeki olası etkileri ve aynı zamanda ekonomik büyüme ve kalkınmanın kültür üzerindeki etkileri tartışılır. Derste uluslararası nitelikteki iş ve çalışmalar sırasında yardımcı olacak temel bilgi ve donanımlar sağlanır.

**COURSE RECORD**

Code	<b>ECON 350</b>
Name	<b>Experimental Economics</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3,4
Type	Elective

Prerequisites	-
Description	The course is designed as an introductory course on experimental economics at undergraduate level. Subjects include how experimental methodology evolved in economics and its current applications as a methodology. Example subjects can be: historical roots of experimental approaches, hypothesis formation and testing, theoretical and experimental analyses of individual decisions and social behavior, experimental analyses of the concepts of distribution, equity and reciprocity, and programming of experiments on computer. The content includes lab experiments, randomized field experiments, lab in the field experiments and online experiments. The advantages and disadvantages of experimental methods are compared to non-experimental methods.
Objectives	Introducing the main concepts of experimental economics. Introducing experimental methodology, and its use and significance in economics. Providing knowledge on conducting lab and field experiments. Examining the topic of social preferences and its effects on economic decisions.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Define main topics, basic concepts and terminology of experimental economics. LO2. Discuss the advantages and disadvantages of experimental and non-experimental methods. LO3. Explain different features of different types of experiments. LO4. Design simple experiments.

İçerik	Ders lisans düzeyinde deneysel ekonomiye giriş dersi olarak tasarlanır. Ders konuları, deneysel metodolojinin ekonomide nasıl geliştiğini ve bir metodoloji olarak mevcut deneysel ekonomi uygulamalarını kapsamaktadır. Örnek konular: ekonomide deneysel yaklaşımların tarihsel kökeni, hipotezlerin kurgulanması ve test edilmesi, bireysel kararların ve sosyal davranışların teorik ve deneysel analizi, bölüşüm, hakkaniyet ve mütakabiliyet olgularının deneysel analizi ve deneylerin bilgisayar ortamında programlanması olarak seçilebilir. Ek olarak laboratuvar deneyleri, rastgele saha deneyleri, sahada laboratuvar deneyleri ve çevrimiçi deneyler incelenir. Deneysel yöntemlerin avantaj ve dezavantajları deneysel olmayan yöntemlerle karşılaştırılır.

### **COURSE RECORD**

Code	<b>ECON 351</b>
Name	<b>Geographical Economics</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3,4
Type	Elective
Prerequisites	-
Description	Focus of the course is the recently developing field of geographical economics where, in general, spatial distributions of economic activity are analyzed. Relations and interactions between geography, trade and economic development are examined throughout the course. Different mechanisms of an economy which can be exemplified as agricultural, manufacturing and services production, labor and capital markets, spatial patterns of consumption and trade are explored throughout the course by using geographical dimensions of space, place, location, and scale. In addition, solutions are proposed for problems that are related to these issues.
Objectives	Showing the geographical way of thinking in relation to economics and how it can be used in the analyses of economic issues.  Introducing the logic of capitalist economic developments as well as its spatial and historical drivers.  Introducing principal concepts of policymaking and providing a basic conceptual toolkit for future studies and research in a broader economic and geographical domain.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Define the use and importance of economic geography in evaluating the mechanisms of operation of societies and economies. LO2. Explain key concepts, techniques and theoretical approaches in geographical economics. LO3. Illustrate the relationships between trade, economic development and geography. LO4. Examine how historical, environmental, cultural and other factors influence economic activity in relation with geographical factors.

İçerik	Dersin odağı ekonomide güncel ve gelişmekte olan bir alan olan ve genel olarak ekonomik faaliyetin mekânsal dağılımının incelendiği coğrafi ekonomi konularıdır. Ders süresince coğrafya, ticaret ve ekonomik kalkınma arasındaki ilişkiler ve etkileşimler incelenir. Tarım, imalat ve hizmet üretimi gibi ekonominin farklı mekanizmaları, emek ve sermaye piyasaları, mekânsal tüketim kalıpları ve ticaret konuları ders süresince mekan, yer, konum ve ölçeğin coğrafi boyutları kullanılarak araştırılır. Ayrıca, bu konularla ilgili sorunların çözüm önerileri incelenir.

**COURSE RECORD**

Code	<b>ECON 352</b>
Name	<b>Economics of Real Estate</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3,4
Type	Elective
Prerequisites	ECON 101
Description	Course is designed mainly to examine the process and techniques of analyzing real property as an investment medium as well as the effects of market conditions and government policies upon real estate investment. The focus of the course is also on the investment relations that have developed especially

	through alternative investment methods in recent years. Mortgage-based investment instruments that are related to the financial crises and real side consequences of these are examined. Factors influencing real estate values such as business cycles, regional and community growth, influences on real estate development are also discussed.
Objectives	Introducing basic concepts of real estate economics. Defining the basic mechanisms of real estate market and financing of real estate. Illustrating techniques for the value and profitability calculations of real estate investments.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Describe how basic economic models work and how they are applied in settings of real estate markets and related public policy challenges. LO2. Interpret the impact of changes in supply/demand dynamics and public policy on real estate markets using analytical and empirical methodologies. LO3. Explain the mechanics of housing finance and of types of housing loans. LO4. Show the fundamental reasons of financial crisis in real estate markets. LO5. Analyze the consequences of financial crisis (such as Mortgage).

Dersin Dili	İngilizce
Tip	Seçmeli
Ön Şart	ECON 101
İçerik	Ders bir yatırım aracı olarak gayrimenkulün analiz süreci ve tekniklerinin yanı sıra piyasa koşullarının ve hükümet politikalarının gayrimenkul yatırımı üzerindeki etkilerini incelemek üzere tasarlanır. Derste ayrıca gayrimenkul ekonomisinde özellikle son yıllarda alternatif yatırım yöntemleri ile gelişen

yatırım ilişkilerine odaklanılır. Finansal krizlerle ilgili olarak mortgage tabanlı yatırım araçları ve bunların reel sonuçları incelenir. Gayrimenkul değerlerini etkileyen iş çevrimleri, bölgesel ve toplumsal büyüme, gayrimenkul gelişimi üzerindeki etkiler gibi faktörler de tartışılır.

### COURSE RECORD

Code	<b>ECON 353</b>
Name	<b>Introduction to Political Economy</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3,4
Type	Elective
Prerequisites	ECON 101
Description	Course is designed to introduce basic topics in the political economy including their relations to both microeconomics and macroeconomics. Main subjects in political economy are examined at undergraduate level. Example subjects are: voting, agency, conflict resolution, social choice, collective decision making, bargaining, allocation, efficiency, corruption, and examinations, modeling, and applications of these subjects in the area of economics. Subjects are examined from different perspectives including both theoretical and empirical studies related to them.
Objectives	<p>Providing foundations for analyzing policy problems using theories of political economy.</p> <p>Introducing how economic and political factors interact to shape and influence policy outcomes.</p> <p>Illustrating how to analyze policy challenges and related concerns critically and analytically from a political economics perspective.</p> <p>Examining some example/widely used critical political analyses.</p>
Learning Outcomes	<p><i>By the end of the course, the student will be able to</i></p> <p>L01. Identify the theoretical and empirical approaches in political economy.</p> <p>L02. Explain the fundamentals of political themes in the development economics.</p> <p>L03. Discuss basic political economic principles.</p> <p>L04. Examine empirical evidence on economic, political and public policy related questions.</p> <p>L05. Show the impossibility of maximizing social welfare.</p> <p>L06. Analyze the effects of political institutions on economic decisions and effects of economic factors (such as growth and income disparity) on political decisions.</p>

Ön Şart	ECON 101
İçerik	Ders, politik ekonominin hem mikroekonomiyle hem makroekonomiyle ilişkilerini içerecek biçimde temel konularını tanıtmak üzere tasarlanır. Politik ekonomi alanındaki temel ve yaygın olarak incelenen konular lisans düzeyinde incelenir. Örnek konular arasında oy kullanımı, politik aracılık, anlaşmazlık çözümleri, sosyal tercih, kolektif karar alma, pazarlık, bölüşüm, verimlilik, yolsuzluk ve bu konuların ekonomi alanındaki inceleme, modelleme ve uygulamaları yer alır. Konular ilgili teorik ve ampirik çalışmaları da içerecek biçimde değişik perspektifler dikkate alınarak incelenir.

**COURSE RECORD**

Code	<b>ECON 354</b>
Name	<b>International Finance</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3,4
Type	Elective
Prerequisites	-
Description	Course is designed as a typical course on international finance which introduces the basic subjects of the area at undergraduate level. Main aim is to introduce international finance as a subdiscipline of economics and to examine related applications in the broader area of economics. The consideration of three significant and connected macroeconomic issues in open economies -exchange rates, capital flows, and financial crises- is given emphasis in the course. The main topics also include forex markets, international parity conditions, forex risks, currency derivatives and hedging issues, and issues with currency investment strategies.
Objectives	Introducing international financial transactions as well as operational aspects of foreign exchange markets. Providing basic knowledge to comprehend the foundations of international financial markets.

	Introducing concepts of forex market participants, exchange rates determination, international arbitrage, foreign exchange risk and its management, and international capital markets.
Learning Outcomes	<p><i>By the end of the course, the student will be able to</i></p> <p>LO1. Identify how international capital markets work.</p> <p>LO2. Explain the distinctions between foreign exchange spot and forward markets.</p> <p>LO3. Discuss concepts such as interest rate parity, purchasing power parity, and the international fisher equation in relation to international parity relations.</p> <p>LO4. Use models to estimate foreign exchange rates.</p> <p>LO5. Examine currency derivatives to hedge currency risk.</p>

İçerik	Ders temel uluslararası finansa giriş konularının tanıtıldığı genel bir lisans düzeyi ders konularını içerecek biçimde tasarlanır. Temel amaç ekonomi biliminin bir alt alanı olarak uluslararası finansın tanıtılması ve ilgili uygulamaların genel ekonomi alanı ile bağlantılı olarak incelenmesidir. Derste açık ekonomilerde üç önemli ve bağlantılı makroekonomik sorunun -döviz kurları, sermaye akışları, finansal kriz- incelenmesine önem verilir. Ayrıca ana konular forex piyasaları, uluslararası parite koşulları, forex riskleri, döviz türevleri ve riskten korunma konuları, döviz yatırım stratejileri ile ilgili konuları içerir.

**COURSE RECORD**

Code	<b>ECON 356</b>
Name	<b>Urban Economics</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3,4
Type	Elective
Prerequisites	ECON 101
Description	Examinations of the location of economic activity and introduction of space into economic models are introduced and focused throughout the course at basic and undergraduate level. The main subject of the course can thus be considered to also include new approaches (compared to classical economic approaches) to development of cities, access to public services, distributions of health institutions, educational institutions and recreational areas, and influences of these on urban life. Housing, urban structures, area usage, social rupture, crime and education are examined through economic models including a focus on planning at the same time.
Objectives	<p>Examining the factors that have promoted urban development in the past and today.</p> <p>Providing knowledge about the possible impacts of different policies that encourage local economic growth.</p> <p>Introducing economic challenges cities face and showing examples of how they deal with these challenges.</p> <p>Providing basic knowledge about dynamics of urbanization in Turkey.</p>
Learning Outcomes	<p><i>By the end of the course, the student will be able to</i></p> <p>L01. Identify how economic activities carried out in the city affect the structure of the city.</p> <p>L02. Explain the economic factors in selected urban issues (such as poverty, transportation, education, employment).</p> <p>L03. Discuss the relationship between the city and the economy from the perspective of sustainability.</p> <p>L04. Apply alternative approaches to existing problems in the relations of urbanization and economy.</p> <p>L05. Analyze the basic models of housing demand and its role in determining the stock of housing in a city.</p>

İçerik	Derste, ekonomik faaliyetlerde yer kavramının incelenmesi ve alan kavramının ekonomik modellere dahil edilmesi konuları temel olarak ve lisans düzeyinde tanıtılır ve odak olarak alınır. Böylece dersin temel konuları arasında şehirlerin gelişimleri, kamusal hizmetlere erişim, sağlık, eğitim kurumları ve dinlendirici alanların dağılımı ve bunların şehir yaşamına etkileri üzerine (klasik ekonomik yaklaşımlara göre) yeni yaklaşımlar yer alır. Derste konut, yapılaşma, alan kullanımı, toplumsal kopma, suç ve eğitim gibi konular ekonomik modellerle ve aynı zamanda planlama odaklı olarak incelenir.

**COURSE RECORD**

Code	<b>ECON 357</b>
Name	<b>Transport Economics</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate / 3, 4
Type	Elective
Prerequisites	ECON 101
Description	This course focuses on key economic principles for a better understanding of the critical factors that structure and guide transport markets. This is accomplished by analyzing how the actions of transport authorities, who carry out the implementation of transport policy, interact with the behavior of individual users and service providers. This course will give students a critical understanding of how economics can be used to solve contemporary transportation sector issues like traffic congestion, high costs, and insufficient service provision (both in terms of quantity and quality).
Objectives	Comprehending the various ideas and fundamentals of transport economics for effective decision making. Analyzing demand and supply of transport including passenger and freight transportation.

	Understanding the connections between transportation and the overall economy, considering the degree and location of economic activity. Exploring alternative transportation models in terms of financing, capacity, efficacy, frequency, and environment
Learning Outcomes	<i>By the end of the course, the student will be able to</i> L01. Make a prepared and delivered critique of the main economic problems with transportation policy. L02. Apply elasticities, supply, demand, and pricing theory to economic analysis using both graphical and numerical analysis. L03. Explain matters pertaining to funding for transportation, road pricing, and public transportation pricing. L04. Explore the issues in transport regulation, funding and ownership. L05. Identify the main topics in economic appraisal and transport economics.

İçerik	Bu ders ulaştırma pazarlarını yapılandıran ve yönlendiren kritik faktörlerin daha iyi anlaşılması için temel ekonomik ilkelere odaklanmaktadır. Bu, ulaştırma politikasının uygulanmasını yürüten ulaştırma otoritelerinin

eylemlerinin bireysel kullanıcıların ve hizmet sağlayıcıların davranışlarıyla nasıl etkileşime girdiğinin analiz edilmesiyle gerçekleştirilir. Bu ders öğrencilere trafik sıkışıklığı, yüksek maliyetler ve yetersiz hizmet sunumu (hem nicelik hem de nitelik açısından) gibi çağdaş ulaştırma sektörü sorunlarını çözmek için ekonominin nasıl kullanılabileceği konusunda eleştirel bir anlayış kazandıracaktır.

Type	Elective
Prerequisites	-
Description	This course serves as an introductory exploration of South Asian economies, spanning from Pakistan to Bangladesh, Nepal to the Maldives, united by close cultural ties and a shared history, such as British colonial rule. Gaining demographic and economic significance, the region is poised to play a crucial role in addressing global challenges like poverty, inequality, and climate change. The course analyzes institutional and cultural aspects, impacting economic structures and the development of South Asian countries, including their foreign economic relations. Students will grasp essential considerations for business relations with South Asian countries.
Objectives	Reviewing the basic economic history of South Asia. Introducing different institutional settings of South Asian countries. Analyzing the economic reform processes in South Asian countries. Introduction into the different economies of South Asia.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Use the basic economic history of South Asian countries to explain the region's past and current economy. LO2. Analyze the influences of the institutional settings of South Asian countries on their economies. LO3. Analyze the influence of the economic and business culture on South Asian economies. LO4. Analyze economies of specific South Asian countries.

AKTS	5
Seviye/Yıl	Lisans/2, 3, 4
Dersin Dili	İngilizce
Tip	Seçmeli
Ön Şart	Yok
İçerik	Bu ders, Pakistan'dan Bangladeş'e, Nepal'den Maldivler'e kadar uzanan Güney Asya ekonomilerinin tanıtıcı bir keşfi olarak hizmet eder. Yakın kültürel bağlar ve Britanya sömürge dönemi gibi ortak bir geçmişle birleşen bu bölge, demografik ve ekonomik önem kazanmaktadır. Bölge, yoksulluk, eşitsizlik ve iklim değişikliği gibi küresel sorunları çözme konusunda kritik bir rol oynayacaktır. Ders, Güney Asya ülkelerinin ekonomik yapıları ve kalkınmalarını etkileyen bölgesel kurumsal ve kültürel benzerlikleri ve farklılıkları analiz eder, bunlar arasında dış ekonomik ilişkiler de bulunmaktadır. Öğrenciler, Güney Asya ülkeleri ile iş ilişkilerinde dikkate alınması gereken temel hususları anlayacaktır.

**COURSE RECORD**

Code	<b>ECON 359</b>
Name	<b>Islamic Economics, Economy, and Finance</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate / 2, 3, 4
Type	Elective
Prerequisites	-
Description	In the 1960s the concepts of Islamic Economics came up as a theory of the third way between Capitalism and Communism. While only few countries, like Iran and Sudan, have tried to regulate their economies completely according to Islamic religious law, Islamic finance and other sectors of a dedicated Islamic economy have developed successfully and spread among Muslim countries. The course is designed as an introduction to the theories of Islamic economics and finance, and their implementation.
Objectives	Introducing the basic theories and methods of Islamic Economics.

	Introducing the Islamic finance sector. Introducing different other sectors of the Islamic economy, e.g., fashion, pharmacy, tourism, entertainment, etc. Analyzing Islamic Economics, Economy, and Finance in the frame of institutional economics and cultural economics.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Compare the basic theories of Islamic Economics and with mainstream economics. LO2. Analyze the basic instruments of Islamic Finance and their applications. LO3. Analyze how the sectors of the Islamic Economy, e.g., fashion, pharmacy, tourism entertainment, etc., are developing. LO4. Make small case studies about specific Islamic economy products or sectors.

İçerik	Bu ders lisans düzeyinde, İslami ekonomi ve finans teorilerine ve bunların gerçekte uygulanmasına ilişkin bir giriş dersi olarak tasarlanır. 1960'larda İslam Ekonomisi kavramı Kapitalizm ve Komünizm arasında duran bir üçüncü teori olarak ortaya çıkmıştır. İran ve Sudan gibi sadece birkaç ülke ekonomilerini tamamen İslam dini hukukuna göre düzenlemeye çalışırken, İslami finans ve İslam ekonomisine bağlı diğer sektörler de başarılı bir şekilde gelişme sürdürmüştür ve bu durum diğer Müslüman ülkeler arasında da

yayılmıştır. Yani bu ders, İslam ekonomisinin bu gelişme süreci hakkında da lisans öğrencilerine bilgi vermeyi amaçlamaktadır.

### COURSE RECORD

Code	<b>ECON 370</b>
Name	<b>Global Economic and Social History</b>
Hour per week	3 (3+ 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/2, 3, 4
Type	Elective
Prerequisites	-
Description	This course examines the major economic transformations from 1500 to the present, providing a historical perspective on the evolution of global economies. It begins by analyzing the characteristic features of pre-industrial economies (1500-1750), exploring how these structures, including agricultural systems and traditional production methods, contributed to the conditions that facilitated the Industrial Revolution. Moving to the Industrial Revolution (1750-1850), the course evaluates the technological innovations and transformations in production processes, as well as their impacts on labor, capital accumulation, and social structures. It also delves into theories and approaches that explain why some countries led the process of industrialization while others lagged behind. Finally, the course focuses on the effects of expanding international trade and technological advancements after 1850, highlighting how developments in transportation and communication systems enabled the global spread of economic activities. These changes are examined in relation to their transformative impacts on industrialized nations, developing economies, regional inequalities, economic colonialism, and the challenges faced by non-industrialized countries.
Objectives	<p>Understanding the characteristics of pre-industrial economies (1500-1750) and their role in enabling the Industrial Revolution.</p> <p>Examining the technological, social, and economic impacts of the Industrial Revolution (1750-1850) on industrialized and non-industrialized nations.</p> <p>Analyzing the effects of trade, technology, and infrastructure on global integration and disparities after 1850.</p> <p>Evaluating how industrialization shaped regional inequalities and economic colonialism.</p>
Learning Outcomes	<p><i>By the end of the course, the student will be able to</i></p> <p>LO1. Identify key features of pre-industrial economies and their role in shaping the Industrial Revolution.</p> <p>LO2. Evaluate theories and approaches explaining the Industrial Revolution, focusing on why some countries led the process while others lagged behind.</p> <p>LO3. Explain the social and economic impacts of technological and production changes during the Industrial Revolution.</p> <p>LO4. Analyze the global effects of international trade, technological advancements, and their role in fostering economic inequalities and colonial impacts on non-industrialized regions after 1850.</p>

Ön Şart	-
İçerik	Bu ders, 1500'den günümüze kadar gerçekleşen büyük ekonomik dönüşümleri ele alarak, küresel ekonomilerin evrimine tarihsel bir perspektif sunar. Ders, öncelikle tarımsal sistemler ve geleneksel üretim yöntemleri gibi sanayi öncesi ekonomilerin (1500-1750) karakteristik özelliklerini inceleyerek, bu yapıların Sanayi İnkılabı'nın gerçekleşmesini sağlayan koşullara nasıl katkıda bulunduğunu araştırır. Daha sonra, Sanayi İnkılabı (1750-1850) dönemine geçerek teknolojik yenilikler, üretim süreçlerindeki dönüşümler ve bunların emek, sermaye birikimi ve toplumsal yapılar üzerindeki etkilerini değerlendirir. Ayrıca, bazı ülkelerin sanayileşme sürecine öncülük ederken, diğerlerinin neden geride kaldığını açıklamaya çalışan teoriler ve yaklaşımlara odaklanır. Son olarak, 1850 sonrası genişleyen uluslararası ticaret ve teknolojik gelişmelerin etkilerini ele alarak, ulaşım ve iletişim sistemlerindeki gelişmelerin ekonomik faaliyetlerin küresel ölçekte yayılmasını nasıl mümkün kıldığını vurgular. Bu değişimler, sanayileşmiş ülkeler, gelişmekte olan ekonomiler, bölgesel eşitsizlikler, ekonomik sömürgecilik ve sanayileşemeyen ülkelerin karşılaştığı zorluklar üzerindeki dönüştürücü etkileri bağlamında incelenir.

**COURSE RECORD**

Code	<b>ECON 401</b>
Name	<b>Data Analysis and Big Data Usage</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/4
Type	Compulsory
Prerequisites	ECON 301
Description	Course is designed to provide necessary tools for conducting research projects and it includes computer applications. Subjects such as data collection, data processing, data analysis and interpretation, transformation of data into information, and regression are examined. In the big data usage section, definition, scope and three important examples of big data in the science of economics (open data, real-time data, managerial data) are introduced. Applications of these big data types are related with the applications of economics in fields such as finance or health economics. In addition, use of big data in empirical studies and estimation processes are examined.
Objectives	Introducing fundamental concepts of data analysis and big data usage. Developing skills of data gathering and analysis. Providing basic knowledge on conducting research in the field of data analytics.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> L01. Recognize the key aspects of data analysis and big data usage. L02. Distinguish the differences between big data types. L03. Extract data from existing data sources and form databases. L04. Implement statistical, mathematical and econometric methods in data analysis with a focus on global issues. L05. Use programs such as Python, R, Stata for solving statistical, mathematical and econometric problems. L06. Construct models and interpret statistical findings.

ECTS	5
Level/Year	Undergraduate/3,4
Type	Elective
Prerequisites	-
Description	Course is mainly designed to enable students develop their analysis skills within the framework of financial economics through reading, examining and discussing academic articles in the field of financial economics. Selected topics in financial economics that are related to risk and risk aversion, financial crises, capital allocation decisions, term structure of interest rates, bond yields, financial regulations, interest rate risks, and behavioral finance are included in the course content.
Objectives	Reviewing the basic concepts of financial economics. Providing foundations for formally discussing selected topics in the field of financial economics. Applying microeconomic, macroeconomic and applied econometric techniques to study financial markets.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Summarize the subjects on the field of financial economics. LO2. Use microeconomic and macroeconomic theoretical tools to analyze financial markets and financial instruments. LO3. Use econometric techniques to analyze and interpret financial data. LO4. Use written and verbal communication skills to present and discuss a research topic in the field of financial economics.

### COURSE CONTENT DETAILS

Topic	Outcomes
Financial economics: an overview, selecting a research topic	L01, L04
Risk and risk aversion, capital allocation decisions, term structure of interest rates, bond yields, interest rate risks, behavioral finance	L01, L02, L03
Research presentation	L04

**DERS BİLGİLERİ**

Kodu	<b>ECON 411</b>
İsmi	<b>Finansal Ekonomide Seçilmiş Konular</b>
Haftalık Saati	3 (3 + 0)
Kredi	3
AKTS	5
Seviye/Yıl	Lisans/3,4
Dersin Dili	İngilizce
Tip	Seçmeli
Ön Şart	Yok
İçerik	Ders temel olarak öğrencilerin akademik makale okuma, inceleme ve tartışma çerçevesinde finansal ekonomi alanında analiz yapabilme yetisi geliştirmelerini sağlamak üzere tasarlanır. Risk, riskten kaçınma, finansal krizler, sermaye tahsis kararları, faiz oranlarının vade yapısı, tahvil getirileri, finansal regülasyon, faiz oranı riskleri ve davranışsal finans ile ilgili ve finansal ekonomi alanında seçilmiş konular ders içeriğinde yer alır.

**COURSE RECORD**

Code	<b>ECON 413</b>

Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3,4
Type	Elective
Prerequisites	-
Description	New research areas that have been developed in the last 5-10 years in the field of microeconomics are examined through original research papers and presentations. Aims include introducing current research in the field of microeconomics, forming bridges between the curriculum course contents and current research if possible, forming an understanding of the similarities and differences between classical and new research examples, and deepening economic understandings of students through discussions and examinations of new research.
Objectives	Introducing the most recent discussions in the field of microeconomics. Reviewing selected recent research in microeconomics. Analyzing theories and empirical studies that are currently being used by researchers in the field. Showing examples of how microeconomic theories and models are applied by researchers.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Explain the methods and practices used in microeconomics. LO2. Discuss empirical evidence and microeconomic phenomena in a variety of areas. LO3. Examine main principles and concepts of microeconomics. LO4. Evaluate existing literature on microeconomics.

ECTS	5
Level/Year	Undergraduate/3,4
Type	Elective
Prerequisites	-
Description	Main aim of the course is to introduce further subjects in the field of microeconomics that are related to microeconomics courses in the core curriculum. 4-8 topics in microeconomics are examined at undergraduate level. Topics are chosen among those that have not been examined or thoroughly examined in the microeconomics courses in the core curriculum. Course is also designed to enable students develop their analytic skills within the framework of microeconomics through reading and examining academic articles and further illustrations of main subjects taught in the core curriculum.
Objectives	Providing additional examples of core concepts and subjects in the field of microeconomics in addition to the basics. Applying the knowledge acquired in previous courses in discussions and analyses of specific cases in microeconomics. Developing the ability to analyze and discuss subjects in the field of microeconomics critically.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Discuss key microeconomic concepts. LO2. Summarize different theoretical models in a conceptually and analytically rigorous form. LO3. Evaluate the most suitable methods for approaching a given topic. LO4. Use written and verbal communication skills to present and discuss a research topic in the field of microeconomics.

#### COURSE RECORD

Code	<b>ECON 421</b>
Name	<b>Growth Economics</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3,4
Type	Elective

Prerequisites	-
Description	Course is aimed at examining issues related to economic growth from both theoretical and empirical perspectives starting from the basic definitions, terminology and questions in growth economics. Basic theories of economic growth, growth policies, structural transformations, effects of economic growth on economic dynamics (such as production and consumption) and related subjects are examined throughout the course. In addition, contemporary applications and issues such as sustainable growth, effects of economic growth on social dynamics and vice versa are discussed in detail.
Objectives	Introducing the fundamental theories explaining economic growth. Illustrating the diversity of theories and perspectives within growth literature. Providing knowledge on the patterns of structural transformations. Introducing existing policy options to enhance economic growth.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> L01. Interpret growth models. L02. Identify potential problems with conducting a growth policy. L03. Discuss major economic issues about promoting economic growth. L04. Design simple growth models.

İçerik	Derste ekonomik büyüme ile ilgili soruların büyüme ekonomisi alanındaki temel tanımlar, terminoloji ve sorulardan başlanarak teorik ve ampirik olarak

incelenmesi amaçlanır. Ders süresince temel büyüme teorileri, büyüme politikaları, yapısal dönüşümler, büyümenin (üretim ve tüketim gibi) diğer ekonomik dinamiklere etkisi ve ilgili konular incelenir. Ek olarak, sürdürülebilir büyüme, büyümenin sosyal dinamiklere ve sosyal dinamiklerin ekonomik büyümeye etkileri gibi güncel uygulamalar ve sorunlar ayrıntılı olarak tartışılır.

### COURSE RECORD

Code	<b>ECON 422</b>
Name	<b>Development Economics</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3,4
Type	Elective
Prerequisites	-
Description	Development economics is taken as an ever-growing field which receives much interest from both state organizations and non-governmental organizations. Taking these two aspects into account, the course is aimed at examining basic and main theories of economic development by relating these to subjects such as development policies and general effects of economic development. Relations between development and growth, trade, business cycles and other economic phenomena are also discussed. In addition, subjects and issues such as inequality and gender issues are examined.
Objectives	Introducing the causes and consequences of different patterns of development. Providing knowledge on structural features of developing economies. Introducing development policy and related concepts. Providing information on the categories of policies that can be applied in different economic settings and how to measure their effects.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> L01. Discuss theories of development. L02. Compare various paths of economic development and their applications from different perspectives. L03. Discuss the policy framework and operational challenges of development. L04. Analyze key economic problems in developed and underdeveloped countries.

İçerik	Kalkınma ekonomisi hem devlet kurumları hem de sivil toplum kuruluşları tarafından ilgi gören ve sürekli gelişen bir alan olarak incelenir. Bu iki aktör dikkate alınarak derste temel ve başlıca kalkınma teorileri, kalkınma politikaları, kalkınmanın genel etkileri gibi konular ile ilişkilendirilerek incelenir. Kalkınma ve büyüme, ticaret, iş döngüleri ve diğer ekonomik olaylar arasındaki ilişkiler de ders süresince tartışılır. Ek olarak, eşitsizlik ve cinsiyetçilik gibi konular ve sorunlar da incelenir.

**COURSE RECORD**

Code	<b>ECON 424</b>
Name	<b>Environmental Economics and Policy</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3,4
Type	Elective
Prerequisites	-
Description	Necessary information and foundations for gaining an understanding and making analyses of the basic problems in environmental economics is provided throughout the course. Topics are developed to encompass the analysis of market failures and policy tools for the solutions of related problems. In addition, subjects such as the theory of public space usage, pollution markets, definition of customer behaviors in the field of environmental economics and their analyses are introduced.
Objectives	Introducing basic problems in environmental economics. Providing knowledge on existing measurements of sustainability in relation to discussions in the field of environmental economics. Developing basic knowledge about policy tools for the analysis and solutions of market failures and related problems in the field of environmental economics.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Define relationships between economics and environmental issues. LO2. Discuss environmental valuation and decision-making techniques.

LO3. Interpret market failures that cause or emerge after environmental crises.  
LO4. Examine environmental policies and existing policy related tools.

İçerik	Derste çevre ekonomisindeki temel problemlerin anlaşılmasında ve analizinde gerekli olan temel bilgiler ve kavramsal çerçeve verilir. Konular piyasa başarısızlıkları analizlerinin ve ilgili sorunların çözümü için kullanılan politika araçlarının kapsanacağı biçimde geliştirilir. Ek olarak, ortak alan kullanım teorisi, kirlilik piyasası, çevre ekonomisi alanında müşteri davranışlarının tanımı ve analizi gibi konular tanıtılır ve tartışılır.

**COURSE RECORD**

Code	<b>ECON 427</b>
Name	<b>Seminar in Theoretical Research in Economics</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	5
Level/Year	Undergraduate/3,4
Type	Elective
Prerequisites	-

Description	The course aims to introduce the nature of the existing milestone theoretical research in economics and thus increase knowledge of theoretical subjects and theoretical research in economics through examples. 3-4 influential hypothetical research examples are examined in both microeconomics and macroeconomics through academic articles. Through the course, students are provided with the opportunity to see and discuss applications, extensions, and various usage ways and areas of the theoretical concepts and subjects they have encountered in core economics courses.
Objectives	Introducing seminal theoretical research articles in the field of economics. Providing foundational knowledge on existing theoretical research methodologies in economics literature. Developing the abilities to analyze and discuss steps of developing a theoretical research project.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Explain the issues involved in a major economic problem. LO2. Analyze alternative methodologies in theoretical research. LO3. Debate on how to use economic theories and models for research. LO4. Conduct literature review on a research topic.

**COURSE RECORD**

Code	<b>ECON 442</b>
Name	<b>Game Theory</b>
Hour per week	3 (3 + 0)
Credit	3
ECTS	4
Level/Year	Undergraduate/3,4
Type	Elective
Prerequisites	-
Description	The course is designed to introduce and examine the fundamentals of equilibrium concepts and related tools in games of complete and incomplete information. Different types of games and existing classifications for these games are introduced. Concepts of Nash equilibrium, Pareto-efficiency, best-response analysis, maximin-minimax methods, solving games with sequential and simultaneous moves, and related subjects are examined throughout the course.
Objectives	Providing a general introduction to game theory. Introducing the concept of Nash Equilibrium. Developing hands on experience on the construction of games from various interactions. Forming a game theoretical basis for analyzing, understanding and predicting the outcomes of various interactions.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Distinguish simultaneous and sequential games. LO2. Determine Nash equilibrium (if any) in various types of games. LO3. Analyze the implications of Nash equilibrium and Pareto Efficiency. LO4. Solve mixed and continuous games.

### COURSE CONTENT DETAILS

Topic	Outcomes
Representation forms: sequential/dynamic games in extensive form, static games in strategic form	L01
Concepts of Nash equilibrium, Pareto-efficiency, and dominance.	L02, L03
Iterated elimination of dominated strategies, best-response analysis, maximin-minimax methods for zero-sum games, mixed strategy equilibria, games with continuous moves	L02, L03, L04

### DERS BİLGİLERİ

Kodu	<b>ECON 442</b>
İsmi	<b>Oyun Teorisi</b>
Haftalık Saati	3 (3 + 0)
Kredi	3
AKTS	4
Seviye/Yıl	Lisans/3,4
Dersin Dili	İngilizce
Tip	Seçmeli
Ön Şart	Yok
İçerik	Ders tam ve eksik bilgi koşullarını sağlayan oyunlarda denge kavramı ve ilgili konu ve araçların temellerinin tanıtılıp inceleneceği biçimde tasarlanır. Derste farklı oyun çeşitleri ve var olan oyun sınıflandırmaları tanıtılır. Nash denge kavramı, Pareto verimlilik, en iyi cevap analizi, maximin ve minimax yöntemleri, eş zamanlı ve sıralı oyunların çözümleri ve ilgili konular farklı disiplinlerde yaygın kullanılan uygulamaları ile başlangıç düzeyinde incelenir.

### COURSE RECORD

Code	<b>ECON 450</b>
Name	<b>Undergraduate Research Project</b>
Hour per week	2 (2 + 0)
Credit	2
ECTS	5
Level/Year	Undergraduate/4
Type	Compulsory
Prerequisites	To have successfully completed 180 ECTS of courses in the Economics Department
Description	During the research project students are guided to examine the literature on a thesis topic to specify their thesis research subjects, to evaluate the literature on a thesis subject/question to determine its significance and contribution, to determine the variables of interest in the analysis of the thesis subject, and to analyze suitable method examples. Students are thus led to receive scientific guidance for writing a research project and to gain experience on research project writing.

Objectives	Applying the knowledge gained in economics courses on an original economic research problem. Developing skills to analyze, discuss and apply economic research methodologies. Providing the experience for completing a research project independently.
Learning Outcomes	<i>By the end of the course, the student will be able to</i> LO1. Examine the literature on a research topic. LO2. Determine the variables of interest in the analysis of the research subject. LO3. Analyze suitable methods. LO4. Conduct an independent research project.

**DERS BİLGİLERİ**

Kodu	<b>ECON 450</b>
İsmi	<b>Lisans Araştırma Projesi</b>
Haftalık Saati	2 (2 + 0)
Kredi	2
AKTS	5
Seviye/Yıl	Lisans/4
Dersin Dili	İngilizce
Tip	Zorunlu
Ön Şart	Ekonomi Bölümü'ndeki 180 AKTS'lik dersi başarı ile tamamlamış olmak
İçerik	Lisans Araştırma Projesi'nde öğrencinin tez konusu olarak belirlediği alanla ilgili literatürü inceleyip araştırma projesi konusunu belirlemesi, araştırma projesi konusu/sorusu ile ilgili literatürü değerlendirerek konu/sorunun önem ve katkısını belirlemesi, konunun hangi değişkenler açısından analiz edildiğini/edileceğini belirlemesi ve uygun yöntem örneklerini incelemesi sağlanır. Böylece öğrencilere araştırma projesi yazımı sırasında gereken bilimsel rehberliğin sunulması ve araştırma projesi yazma tecrübesinin kazandırılması amaçlanır.

**COURSE RECORD**

Code	<b>ECON 499</b>
Name	<b>Internship</b>
Hour per week	0 (0 + 2)
Credit	1
ECTS	7
Level/Year	Undergraduate/3,4
Type	Compulsory
Prerequisites	To have successfully completed 150 ECTS of courses in the Economics Department
Description	Internship program is for economics undergraduate students to be introduced to working and business life prior to graduation and therefore accumulate certain levels of related job experience before they are employed as graduates. It is aimed throughout the program that students learn and choose business areas that are compatible with their skills and interests, and they also seize the opportunity to observe real-life applications of the discipline of economics and other related disciplines that they have encountered during their coursework. Additionally, it is aimed that students find room to apply the practices they have learned in their courses.
Objectives	<p>Providing students with the opportunity to have a real-world experience in a workplace setting where students can employ their economic knowledge.</p> <p>Providing students with learning experience that allows interns to receive mentoring on-the-job during the internship.</p> <p>Enabling students to observe the dynamics of their business areas of interest in workplaces.</p>
Learning Outcomes	<p><i>By the end of the course, the student will be able to</i></p> <p>L01. Relate the theoretical knowledge gained in courses to real-life problems that are faced in business environment of internship.</p> <p>L02. Match necessary skills and knowledge both personally and in relation to professional areas.</p> <p>L03. Find out more information about the possibilities of employment in potential areas of interest.</p> <p>L04. Examine application areas of practical knowledge that are not explicitly taught in the curriculum.</p> <p>L05. Use knowledge and experience pertaining to working environments of graduates of economics and related disciplines.</p>

AKTS	7
Seviye/Yıl	Lisans/3,4
Dersin Dili	İngilizce
Tip	Zorunlu
Ön Şart	Ekonomi Bölümü'ndeki 150 AKTS'lik dersi başarı ile tamamlamış olmak
İçerik	Staj programı ekonomi lisans öğrencilerinin mezun olmadan önce iş hayatını tanımları ve bu sayede işe başlamadan önce belirli bir tecrübe ve bilgi birikimi kazanmaları için hazırlanmış bir programdır. Program boyunca öğrencilerin beceri ve ilgi alanlarına uygun iş alanlarını öğrenmeleri ve seçmeleri hedeflenirken, aynı zamanda ekonomi disiplini ve öğrenimleri sırasında karşılaştıkları diğer ilgili disiplinlerle ilgili olarak gerçek yaşam uygulamalarını gözleme fırsatı elde etmeleri amaçlanır. Ayrıca öğrencilerin derslerde öğrendikleri uygulamaları ve bilgileri uygulama alanı bulmaları hedeflenir.
